**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-5, 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Bufferd et al. (U.S. Patent No. 5,706,330).

Regarding claims 1, 3, Bufferd et al. disclose a mobile communication system comprising: a mobile terminal, a mobile exchange having a database for holding accounting information of the mobile terminal, and a mobile terminal controller, provided in an offerer of pay facilities, for transmitting dummy or random location information to the mobile terminal carried by a user of the pay facilities, for connecting a call to the mobile exchange to provide the mobile exchange with user information when the mobile terminal transmits a location registration demand message with the user information in response to the location information, for notifying the mobile terminal of the user information when the mobile exchange retrieves the user information in the database, and for providing the database with accounting information of a facilities rate [col. 2, lines 48-67, col. 3, lines 1-11].

Regarding claims 4-5, 9, Bufferd et al. disclose the mobile communication system as claimed in claim 1 wherein the mobile exchange has means for storing which mobile exchange's database holds which user information, and means for retrieving a database of another mobile exchange which holds the user information from the storing means to demand the other mobile

exchange to retrieve the user information when the mobile exchange can not retrieve the user information from its database [col. 9, lines 56-64].

*Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 6-8, 10-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bufferd et al. in view of Brendzel et al. (U.S. Patent No. 5,706,031).

Regarding claims 2, 6, 10-11, Bufferd et al. fail to teach means for transmitting the location information when an interruption of a light source by a user of the mobile terminal occurs and for suspending the transmission when the user information is received. Brendzel et al. teach position detection using a light source and a photo transistor [col. 3, lines 29-55]. It would have been obvious to one of ordinary skill in the art at the time of the invention to use the position detection technique as disclosed in Brendzel et al. in the system of Bufferd et al. for convenience.

Regarding claim 7, the examiner takes official notice that display means is well known in the art. for user's convenience.

Regarding claim 8, the examiner takes official notice that password inputting means and password checking means are well known in the art and used for security purpose.

*Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Keller et al. (U.S. Patent No. 6,496,689) teach incucation of charging information using the ussd mechanism.
